Ankara / Turkey

### Education

**Suleyman Demirel University**

Bachelor of Computer Engineering

Completed in 2018

**Lublin University of Technology**

Bachelor of Computer SCIENCE

Completed in 2016 (Feb. - June) (Erasmus+).

### Skill

- Javascript
- React.js
- Redux
- Next.js
- Typescript
- Astro.js
- Tailwind
- AWS, Azure, Cloudflare
- Node.js
- Nest.js
- MongoDB
- PostgreSQL
- GraphQL
- Webpack
- Docker
- Socket.io

### Reference

**Ender Özmen**

Head Of Payments / Jotform

**Neetu Mogha**

Senior Technical Lead / Builder.ai

## Work Experience

**Cressoftware Consultancy**

Oct 2022 - June 2025

### React Developer - Remote

At Builder.ai, I contributed to multiple projects, including a Social Media App, a B2B E-commerce platform, and lastly, a feature-rich Whiteboard web application.

**Tech Stack:** React.js, Redux, Typescript, Fabric.js, Material Ui, Scss

**Jotform**

June 2018 - April 2022

### React Developer - Office

Started on the **Maintenance team**, resolving bugs and supporting smaller projects for five months to maintain system stability.

Later joined the **Payment Integration team**, enhancing product workflows, implementing new payment gateways, and managing 30+ integrations for seamless transactions.

**Tech Stack:** React.js, Flux, Redux, PHP, Typescript, Scss

**Gigbi**

Oct 2017 - March 2018

### Frontend Developer - Remote

This was my first professional experience. Just before graduating from university, I developed all the UI parts for [Gigbi.com](#).

**Tech Stack:** Javascript, Css, Bootstrap 4, Sass, jQuery

## Projects

**CalculatorPlanet**

May 2025 - Present

### React / Next.js Developer

Developed **CalculatorPlanet.app**, a multi-language calculator platform built with Next.js. with i18n and optimized UX.

**Tech Stack:** React.js, Next.js, Typescript, Tailwind, Cloudflare (Pages, Functions, D1)

**Sanatkardan**

Dec 2020 - May 2024

### Fullstack Javascript Developer

Developed a full-stack eCommerce web application independently, covering frontend (storefront, merchant panel, admin panel), backend, and DevOps tasks including Docker integration.

**Architected a micro-frontend structure** using Webpack 5 Module Federation for scalable, modular development.

**Tech Stack:** React.js, Next.js, Redux, Node.js, GraphQL, MongoDB, Docker, React Native, Antd, Socket.io, Webpack 5 with Module Federation

## Other Experiences

**Global Game Jam**

2019

### Javascript Developer

Developed a real-time multiplayer game called "**Cavemen**" using Socket.IO within 48 hours.

**Tech Stack:** Socket.io, Phaser, Node.js

**IEEE - Computer Society**

Feb 2017 - June 2017

### Head of Computer Society

Led the IEEE Computer Society as president, organizing conferences and technical courses. Also created the society's logo and managed graphic design work.
